RE: United States Synthetic Fuels Corporation, Inquiry  
About the Seep Ridge Project, ACT/047/002, Uintah  
County, Utah

Steve Hoffman, a representative from the U. S. Synthetics Fuels Corporation telephoned the Division on April 9, 1985 inquiring about the status of the Geokinetic's Seep Ridge Project. He wanted to know if there were any lurking problems with this project regarding the mining permit. I told him I had worked on the Geokinetics project for about two years and was not aware of any major pitfalls in obtaining their mining permit. They have been timely in their responses and have submitted quality information.

He said that if the Division has any questions about this project and the status with the U. S. Synthetic Fuels Corporation, he could be contacted. His phone number is (202) 822-6497.
